Seoul Dairy White Milk in SIG Terra Alu-free + Full barrier recognized at World Dairy Innovation Awards 2026

SIG and Seoul Dairy Cooperative have won the “Best CSR/Sustainability Initiative” category at the World Dairy Innovation Awards 2026 for Seoul Dairy White Milk in SIG Terra Alu-free + Full barrier – the world’s first full barrier aseptic carton packaging material without an aluminum layer.

Presented at the Global Dairy Congress, the World Dairy Innovation Awards recognizes the companies, products and technologies shaping the future of the global dairy industry. This recognition highlights the growing importance of material innovation in helping dairy producers meet consumer expectations for high-quality, safe, and sustainable products.

In South Korea, Seoul Dairy became the first company to launch products in SIG Terra Alu-free + Full barrier, bringing this aluminum-layer free full barrier aseptic carton packaging to Korean consumers through its white milk range. It was the first aseptic carton recognized as recyclable under Korean regulations. The launch marked an important milestone for the Korean dairy industry, showing how collaboration between a leading dairy producer and a packaging solutions provider can bring practical sustainability innovation to market.

Moon Jin-Seop, President at Seoul Dairy Cooperative: “At Seoul Dairy, our priority has always been to deliver trusted, high-quality dairy products that consumers can feel confident about. As the first company in Korea to bring shelf-stable milk to market in an aseptic carton pack without an aluminum layer and with full barrier protection, we are pleased to see this initiative recognized internationally.”

“We are honored to see SIG Terra Alu-free + Full barrier recognized by the global dairy community”, added **Hans Cho, Head of Market South Korea at SIG.** “This award demonstrates that sustainable packaging innovation has an important role to play in helping dairy producers deliver trusted, high-quality products while reducing the environmental impact of packaging. Together with Seoul Dairy, we are proud to bring this innovation to Korea and show how collaboration can help move the industry forward.”

About SIG

SIG is a leading solutions provider of packaging for better – better for our customers, for consumers, and for the world. With our unique portfolio of aseptic carton, bag-in-box, and spouted pouch, we work in partnership with our customers to bring food and beverage products to consumers around the world in a safe, sustainable, and affordable way. Our technology and outstanding innovation capabilities enable us to provide our customers with end-to-end solutions for differentiated products, smarter factories, and connected packs, all to address the ever-changing needs of consumers. Sustainability is integral to our business, and we strive to create a regenerative food packaging system.

Founded in 1853, SIG is headquartered in Neuhausen, Switzerland, and listed at the SIX Swiss Exchange. The skills and experience of our approximately 9,700 employees worldwide enable us to respond quickly and effectively to the needs of our customers in over 100 countries. In 2025, SIG produced around 54 billion packs and generated €3.2 billion in revenue. SIG has an AAA ESG rating by MSCI, a Platinum CSR rating by EcoVadis, and is included in the FTSE4Good Index.
