SIG receives recognition for lowering carbon footprint across packaging and operations in Thailand

SIG Thailand has been awarded three key carbon reduction certifications, reinforcing its leading role in sustainable packaging and operations. The Thailand Greenhouse Gas Management Organization (TGO) recognized SIG with the Carbon Footprint of Product (CFP), Carbon Footprint Reduction (CFR), and Carbon Footprint for Organization (CFO) certifications, highlighting the company's measurable impact in reducing emissions.

"This recognition reflects SIG's commitment to contribute more to society and the environment that it takes. This year, we received carbon reduction certifications for 15 SIG aseptic carton packaging formats produced in our packaging plant in Rayong, Thailand, along with recognition for sustainable, low-carbon operational practices. These certificates will provide customers with

verified data on SIG's packaging formats, enabling them to conduct lifecycle assessments and integrate more sustainable solutions into their supply chains." said **Vatcharapong Ungsrisawat, Regional Director for Thailand, Laos, Myanmar, and Cambodia at SIG.**

Driving Carbon Reduction Across the Value Chain

- The Carbon Footprint of Product (CFP) certification measures a product's total greenhouse gas emissions from raw material sourcing to disposal in Thailand.
- The Carbon Footprint Reduction (CFR) certification verifies that the production emissions for the submitted packaging format have decreased compared to a previous baseline year, reflecting overall reductions in manufacturing emissions across all formats.
- The Carbon Footprint for Organization (CFO) certification evaluates emissions across the entire operational footprint and aligns with international Greenhouse Gas (GHG) Protocol standards.

"These certifications recognize our ongoing efforts to reduce our environmental impact, primarily through improvements in our operations", said **Anuluk Janyao, EHS Deputy Manager at SIG Thailand.**

The CFP certification was awarded to all 22 packaging formats manufactured in SIG's packaging plant for aseptic carton packs in Rayong, Thailand. This demonstrates the company's ability to meet the evolving sustainability requirements of customers in both domestic and international markets.

About SIG

SIG is a leading solutions provider of packaging for better – better for our customers, for consumers, and for the world. With our unique portfolio of aseptic carton, bag-in-box, and spouted pouch, we work in partnership with our customers to bring food and beverage products to consumers around the world in a safe, sustainable, and affordable way. Our technology and outstanding innovation capabilities enable us to provide our customers with end-to-end solutions for differentiated products, smarter factories, and connected packs, all to address the ever-changing needs of consumers. Sustainability is integral to our business, and we strive to create a net positive food packaging system.

Founded in 1853, SIG is headquartered in Neuhausen, Switzerland, and listed at the SIX Swiss Exchange. The skills and experience of our approximately 9,600 employees worldwide enable us to respond quickly and effectively to the needs of our customers in over 100 countries. In 2024, SIG produced 57 billion packs and generated €3.3 billion in revenue. SIG also has an AAA ESG rating by MSCI, a Platinum CSR rating by EcoVadis, and is included in the FTSE4Good Index.
