VISIBILITY AND DIGITAL MANAGEMENT OF ENTIRE PRODUCTION CHAIN ENSURES INCREASED EFFICIENCY AND TRACEABILITY IN MINUTES

Brazil: Mococa expands partnership with SIG with adoption of **PAC.TRUST** digital solution

Mococa Produtos Alimentícios, a well-known company for dairy products in Brazil, has chosen to leverage the technological capabilities of SIG's **PAC.TRUST** solution to sustain growth and prepare for future expansion. Already an important partner of SIG, the company relies on SIG's solutions and technologies for the aseptic filling of its products.

Through SIG's **PAC.TRUST** digital solution, Mococa will have complete visibility of its

production process, from the arrival of raw materials in the production plant to confirmation of delivery of finished products at the point of sale. This ensures real-time monitoring and control, full traceability in minutes, resulting in increased factory efficiency.

Operational digitization involves control of inputs and materials, laboratory and shop floor analyses, production management, and the entire logistics chain, making it possible to even identify at which point of sale the product is located.

*For Mococa's Information Technology Manager Marcos Godinho SIG's technology now makes the company's internal processes even more agile: "With **PAC.TRUST**, it will be possible to reduce manual operations, give even more reliability to the processes, and provide our management team with information in real time. The team has information in the palm of their hands, making our decision-making process even more accurate, reinforcing Mococa's commitment to deliver accessible and high-quality products to its consumers".*

The partnership between Mococa and SIG began in 2021 with filling machines from SIG for filling dairy blends. Today Mococa fills cream, culinary cream and dairy blends into aseptic carton packs from SIG.

With quality products and industrial excellence, Mococa has become one of the main dairy brands in Brazil and has shown significant growth in the last two years, requiring the company to continue seeking new ways to optimize its operation. As a way of sustaining this growth and preparing for future expansions, Mococa sought the SIG's **PAC.TRUST** solution, to bring even more technology to its industrial and logistics plant in the city of Mococa.

*For SIG's Digital Solution Expert Lucas Silva **PAC.TRUST** will offer Mococa the tools to reach levels of industrial and logistical efficiency, which will be a benchmark for the dairy industry: "With our **PAC.TRUST** digital solution, Mococa will have visibility of its entire supply chain operation, using systemic alerts, reports and automated dashboards, to continue implementing actions that will result in greater efficiency and mitigate unnecessary costs. This will save supplies, materials and time, mitigate deviations, and make the company as a whole more sustainable."*

About SIG

SIG is a leading packaging solutions provider for a more sustainable world. With our unique portfolio of aseptic carton, bag-in-box, and spouted pouch we work in partnership with our customers to bring food and beverage products to consumers around the world in a safe, sustainable and affordable way. Our technology and outstanding innovation capabilities enable us to provide our customers with end-to-end solutions for differentiated products, smarter factories and connected packs, all to address the ever-changing needs of consumers. Sustainability is integral to our business and we are going Way Beyond Good to create a net positive food packaging system.

Founded in 1853, SIG is headquartered in Neuhausen, Switzerland. The skills and experience of our approximately 8,400 employees worldwide enable us to respond quickly and effectively to the needs of our customers in over 100 countries. In 2021, SIG produced 48 billion packs and generated €2.7 billion in revenue (incl. Scholle IPN and Evergreen Asia unaudited revenue). SIG has an AA ESG rating by MSCI, a

13.4 (low risk) score by Sustainalytics and a Platinum CSR rating by EcoVadis. For more information, visit www.sig.biz

About Mococa

Founded in 1919, in the city of Mococa, São Paulo, Mococa S/A Produtos Alimentícios was born as an artisanal production of butter and was the first industry in Brazil to produce powdered milk in 1956. In the coming years, the company improved its production of condensed milk, expanding its range of products and packaging in 1989. Then, it went through technological innovations, launching products such as cereals, porridge, milk flour, and chocolate milk. It conquered the international market, exporting its products to countries in Latin America, Central America, the United States and Africa.
